We just have absenteeism problems  
...and turnover and hiring problems  
...and high workers' comp costs  
...and high health care costs.

Oh, maybe we do have a drug  
problem!

The economic impact of substance abuse in Oregon is huge - \$5.9 billion per year as reported by ECONorthwest. Much of this cost (over \$4 billion) is lost productivity, which affects our competitiveness and prosperity. Combating substance abuse has become one of the toughest challenges for Oregon employers. *But it can be done!*

Join us June 17 to learn how local businesses have turned their companies around by addressing substance abuse head-on! Learn how to tackle this problem step-by-step in your own workplace. We'll also hear from a representative of Liberty NW on the discounts available to businesses who have drug-free workplace plans in place.
